

# tesa® 4174

Fine line tape for design painting

## Product Description

tesa® 4174 is an extra-skinning tape with a PVC substrate and a natural rubber adhesive mass. The fine line tape, which resists temperatures of up to 150 °C, is suitable for covering sharp edges and is a valuable aid when carrying out paint jobs on cars and motorbikes. Due to the high degree of stretchiness, painters can tackle challenging jobs with ease, e.g. painting bumpers. This special adhesive tape can be torn by hand, is easy to handle and can be removed quickly after use.

## Product Features:

- Masking of painted and non-painted substrates (e.g. automotive plastic parts) that require sharp and flat paint edges
- Two-tone car body masking

## Technical Information (average values)

The values in this section should be considered representative or typical only and should not be used for specification purposes.

## Product Construction

Backing material **PVC film**

Type of adhesive **natural rubber**

Total thickness **110 µm**

## Properties/Performance Values

Elongation at break **200 %**

Tensile strength **25 N/cm**

Flame retardance **very good**

Hand tearability **very good**

## Adhesion to Values

Steel **3.7 N/cm**
