

# tesa® 4287

Tensilised strapping tape

## Product Description

tesa® 4287 is a tensilised polypropylene strapping tape with a natural rubber adhesive system.

tesa® 4287 exhibits good tensile strength with low elongation at the same time. The applied product is highly heat and cold resistant.

## Application Fields:

- Palletising, belting of electronic components, bundling and closure of shipping cartons.

## Technical Information (average values)

The values in this section should be considered representative or typical only and should not be used for specification purposes.

### Product Construction

Backing material **MOPP**

Type of adhesive **synthetic rubber**

Colour **orange**

Total thickness **79 µm**

### Properties/Performance Values

Elongation at break **35 %**

Tensile strength **180 N/cm**

No discolouration **Yes**

Residue free removal **Yes**

### Adhesion to Values

Steel **6 N/cm**
