

# tesa® 4288

Medium duty tensilised strapping tape

## Product Description

tesa® 4288 is an extremely stable, medium duty polypropylene strapping tape with a natural rubber adhesive system.

tesa® 4288 exhibits high tensile strength with low elongation at the same time. The applied product is highly heat- and cold-resistant and due to the black backing, extremely resistant to UV-light.

## Application Fields:

- Bundling of copper, iron and plastic pipes, palletising and coil tabbing.

## Technical Information (average values)

The values in this section should be considered representative or typical only and should not be used for specification purposes.

## Product Construction

Backing material **MOPP**

Type of adhesive **synthetic rubber**

Colour **black**

Total thickness **114 µm**

## Properties/Performance Values

Elongation at break **35 %**

Tensile strength **300 N/cm**

No discolouration **Yes**

Residue free removal **Yes**

## Adhesion to Values

Steel **6 N/cm**
