

tesa® HAF 8473

80µm amber reactive structural bonding film.

Product Description

tesa HAF® 8473 is a reactive heat activated structural bonding film based on phenolic resin and nitrile rubber. This amber double sided tape has no backing. It is protected by a strong paper liner. It is activated by heat and pressure applied during the assembly process.

Product features:

- Extremely high performance, even on small bonding areas and thin design gaps
- Reliable and ageing-resistant bonds
- Very low oozing ratio
- Suitable for long-term applications that are exposed to heavy stress
- Free of halogen and compliant with current ROHS standards

Application Fields:

- tesa HAF® 8473 is especially recommended for bonding of metal components to metal surfaces or heat resistant plastics, e.g. SUS or AL to PI, PMMA or ABS:
- Constructive bonding inside electronic devices
- FPC bonding
- Button fixation
- Camera lens and bezel mounting
- Bonding of decorative metal components.

Technical Information (average values)

The values in this section should be considered representative or typical only and should not be used for specification purposes.

Product Construction

Backing material **none**

Color **amber**

Total thickness **80 µm**

Type of adhesive type: **nitrile rubber / phenolic resin**

Type of liner type: **glassine**

Properties / Performance Values

Bonding strength **7 N/mm²**
